ICD-10-PCS A&P Module: Obstetrics (10)

Course Description

The **ICD-10-PCS Module: Obstetrics (10)** is designed to enhance coding professionals' knowledge in anatomy, physiology, and pathophysiology terminology for conditions related to medical and surgical procedures for obstetrical procedures. It also reviews the ICD-10-PCS codes as it relates to these conditions. This module concludes with a 20-question final self-assessment test to assess your practical knowledge of the skills reviewed.

Learning Objectives

- Identify the types of procedures included the Obstetrics Section of ICD-10-PCS
- Review the anatomical structures pertaining to the Obstetrics Section
- Identify common procedures conducted on structures covered in the Obstetrics Section
- Discuss the pathophysiology necessitating these procedures
- Review the ICD-10-PCS code structure
- Explain terminology required to code from the Obstetrics Section of ICD-10-PCS
- Know how to build an obstetrical code in ICD-10-PCS

This course also qualifies for **2 hours** towards AAPC and AHIMA's new ICD-10 CE
