

ICD-10-PCS A&P Module: Skin and Breast (0H0-0HX)

Course Description

The **ICD-10-PCS A&P Module - Skin and Breast** is designed to enhance coding professionals' knowledge in anatomy, physiology, and pathophysiology terminology for conditions related to the mouth and throat. This module reviews the ICD-10-PCS categories (0H0-0HX) and its ICD-10-CM terminology. This module concludes with a 20-question final self-assessment test to assess your practical knowledge of the skills reviewed.

Learning Objectives

- ✔ List the functions of the skin and relate them to its structure.
- ✔ Describe the histological structure of the epidermis, dermis, and subcutaneous tissue.
- ✔ Describe the normal and pathological colors that the skin can have, and explain their causes.
- ✔ Describe the common markings of the skin.
- ✔ Distinguish between three types of hair.
- ✔ Describe the histology of a hair and its follicle.
- ✔ Discuss some theories of the purposes served by various kinds of hair.
- ✔ Describe the structure and function of nails.
- ✔ Name two types of sweat glands, and describe the structure and function of each.
- ✔ Describe the location, structure, and function of sebaceous and ceruminous glands.
- ✔ Discuss the distinction between breasts and mammary glands, and explain their respective functions.
- ✔ Describe the three most common forms of skin cancer.
- ✔ Describe the three classes of burns and the priorities in burn treatment.
- ✔ ICD-10-PCS Section 0H0-0HX.

This course also qualifies for **2 hours** towards AAPC and AHIMA's new ICD-10 CE
